

Safeguard Your Data and Technology with CyberPRO

The financial and personal data collected and stored on your company's computers and mobile devices is extremely important to you. That data is also extremely vulnerable to hackers. Hackers are not just interested in the large guys. They also look for soft or vulnerable targets, like small and medium businesses.

CyberPRO coverage includes all-in-one protection for devices, data, and people. Built on one of the largest, threat detection networks available, CyberPRO delivers superior, enterprise-grade protection, keeping small and medium businesses safe by analyzing and blocking suspicious information coming and going from devices. It also blocks malicious files, dangerous websites, unauthorized connections and other threats.

CyberPRO Coverage Includes

Data Breach—The loss or possible unauthorized revealing of sensitive personal data or any data relating to individuals

Privacy Liability—Triggered by the collection, retention, processing and distribution of personal/sensitive data. Privacy is not Data Breach.

Remediation Costs—Credit monitoring, data restoration, forensics, legal representation, notification, and public relations including 24/7/365 immediately access

Payment Card Industry (PCI) Compliance—Fines and penalties covered by the policy; assessment costs to cover re-issue costs as well as fraudulent transactions

Cyber Extortion (Ransomware)—The threatened revealing of personally identifiable information (PII) or the threat of interrupting operations through a targeted attack

Multi-Media—Defamation (libel, slander, product disparagement), intellectual property rights (copyright, trademark, domain name), piracy and misappropriation of ideas (but NOT patent or trade secret)

Network Security Liability—Legal liability coverage for losses caused to third-parties by negligent or inadvertent onward transmission of a virus or malware

Non-Physical Damage Business Interruption—Loss of revenue due to network breakdown following outage caused by computer attack, operator error or loss of data including failure of outsourced elements (but not infrastructure failure) and including reputational harm following adverse media

AVAST Business-CloudCare—Backup and disaster recovery protects mission-critical data, sets backup and recovery policies from either the cloud or onsite backup and restores data to the new designated location

Let Us Help You Prepare for a Secure Future!

Based on a revenue of \$500,000 we estimate CyberPRO insurance could cost you as little as:

\$227.00 annually—\$100,000* limit (not including tax/fees)
